

The background of the image is a teal-colored water slide structure, showing multiple curved lanes and support beams. The slide is set against a bright sky. Overlaid on the image are numerous semi-transparent circles in various colors, including orange, yellow, green, blue, purple, and red, creating a vibrant, abstract pattern.

WATER SLIDES

GOH2O

GoH2O offers the best of both worlds! This brand combines the creativeness and innovative drive of a new player on the market with the reliability and quality of a well-established company. That's because GoH2O is Watergames & More's brand-new brand and Watergames

and More is, and has been for many years, the specialist in absolute top-quality water recreation. If you are looking for a sensational, high-grade and long-lasting water slide for a very reasonable price, then please allow us to introduce GoH2O!

GoH2O creates water slides, customised to suit every location and every budget, with a primary focus on real adventures – not only for your guests, but for you, our customer, too.

THE ADVANTAGES FOR THE END USERS

GoH2O water slides are challenging, very fast and come with spectacular lighting and sound effects to make a ride on a GoH2O a real adventure! Bumping into painful joints is a thing of the past, because these slides are seamless. GoH2O guarantees bundles of fun for every target group!

THE ADVANTAGES FOR YOU

GoH2O means no worries for you. If you buy a water slide from GoH2O, we take care of absolutely everything, starting with the fitting of the water installation and building additional foundations, if necessary, right up to the slide's turnkey delivery – all for an extremely reasonable price. Naturally, our attractive

prices do not affect the quality of our slide. In fact, nothing could be further from the truth: GoH2O uses extremely high-grade polyester, which means that our slides require less maintenance and will last longer, an advantage reinforced by the fact that our slides do not have any unhygienic, maintenance-sensitive seams in their sides. Moreover, we supply customised solutions: whatever your wishes may be, we will make sure they become a reality!

THE ADVANTAGES OF GOH2O:

- Turnkey delivery
- Customised to suit every location and every budget
- Can be fully adapted to suit any wishes
- Extremely high quality
- Long-lasting and low maintenance
- Spectacular lighting and sound effects

CHALLENGER

The GoH2O Challenger is the most popular of our water slides for both young and older users. This slide can be fitted with a variety of special effects so that users will discover new surprises after each bend. For instance, you can turn a standard GoH2O Challenger into an exciting black hole, a colourful and enchanting spiral or a stylish yet mysterious slide with a stained-glass look and sound effects.

VOYAGER

Speed, thrills and sensation: the GoH2O Voyager has it all! This extreme water slide can be conquered in a raft or on a mat and can be used by several people at once. The GoH2O Voyager is available as a tube and as a half-tube with either a flat or semi-circular bottom. For even more appeal, special effects can be added to the slide, including a stained-glass look, LED lights, music and wonderful aromas.

THRILLSEEKER

The GoH2O ThrillSeeker is our most extreme slide – only suitable for users with a larger than average dose of courage. Despite that, this slide is tremendously popular. The GoH2O ThrillSeeker is particularly sensational due to its enormous speed. The higher you start to slide, the more thrilling the slide will be!

SUPERSLIDER

The GoH2O SuperSlider is a great favourite at water parks. After all, what could be more fun than sliding down a chute together? The length of the slide and the number of bumps merely add to the enjoyment. And the more tracks there are, the more exciting race will be! Use a mat for more speed: you will find yourself gliding across the surface of the water like a surf rider.

WAVERIDER

The GoH2O WaveRider is probably the oldest and most adored slide ever found in public swimming baths. That's not surprising, as you can ride this slide to the bottom with a group of friends or relatives at the same time. The GoH2O WaveRider is very safe and it has an open tube, so it is extremely suitable for families with [young] children too. It's an ideal slide for all ages!

JIGGLER

The GoH2O Jiggler is a whirl of fun! First, you step into a GoH2O Challenger water slide, which ensures great acceleration. Then you are tossed into the GoH2O Jiggler where you will spin round at top speed. Finally, you will drop through a hole into a swimming pool. And to add to the excitement, we have equipped the slide with lighting and acoustic effects for a sensation that is out of this world!

CUSTOMISE YOUR SLIDE

A slide is only really complete when it has been fully adapted to suit your tastes! Accordingly, GoH2O offers separate elements that can be added to our slides. These elements range from steps to catch units and

from special effects to safety devices: The options are countless! We like to take a constructive approach to the additions that will give your slide the finishing touch.

CUSTOMISE YOUR SLIDE

CATCH UNIT

If you decide to install a water slide, it is important to study the safest solutions for landing and for leaving the slide. Accordingly, GoH2O has a range of catch units to catch the users safely and lead them safely off the slide. A catch unit will minimize the risks of visitors bumping

into each other. Because the catch unit contains shallow water, users can leave the slide quickly. We offer different types of catch units; naturally, all of them can be adapted to suit your taste.

POLYESTER OR STEEL STEPS

Good steps are essential for the safety of the users and for the slide's appearance. That's why we create fully customised steps, like we do our slides. The steps themselves have an anti-slip finish and the design will be adapted to suit the theme of the swimming pool. Spiral steps are the most popular, as they are suitable for slides

in limited spaces. When more room is available, we often recommend a tower with intermediate platforms. These towers are also suitable for water slides where users can use mats or tyres for sliding down the chutes. And of course, all our steps comply with the relevant legislation and regulations, just like our slides do.

POLYESTER STEPS

- Easy access
- Visually attractive
- Anti-slip finish
- No water dripping onto lower steps
- Large surface for advertising
- Made from glass fibre reinforced polyester
- Completely matches the style of your swimming bath

STEEL STEPS

- Produced in-company
- Seamlessly joined to slide
- Optional full powder coating in any RAL colour you want
- Completely matches the style of your swimming bath

CUSTOMISE YOUR SLIDE

ELECTRONIC SYSTEMS

How can we make a slide even more sensational? GoH2O offers a range of electronic systems that will enhance the fun of sliding. How about action shots or signs displaying your speed? With these GoH2O systems, your slide will be completely up to date! Moreover, our systems can be used to increase the safety of your slide.

START-STOP SYSTEM

This system signals users, letting tell them know when it is safe to slide down the chute. This start-stop system allows users to slide in an orderly fashion so the slide is safer to use. The red and green lights switch on and off at a rapid pace but you can also link them to movement sensors in the slide.

ACTION SHOTS

What could be more fun than an action shot as you glide down a thrilling slide? The camera has a movement sensor that reacts when someone slides past it. A number can be allotted to the picture once it has been taken, so the user can purchase it. The system can also be linked to Facebook and/or Twitter so that pictures can be posted on social media accounts.

THE STOPWATCH

If you install a stopwatch, users will be encouraged to use the slide more often to improve their speeds. The sensors hidden at the beginning and end of the slide record the times which are then displayed on a scoreboard. The board can also display the daily and monthly records.

FOLLOW THE USER

Using sensors hidden in the slide, we can record the users' speeds and determine where the user is at a particular moment. This increases the safety in extreme slides and makes the slide more attractive for onlookers.

INSULATION

A water slide, especially one that is partly outdoors, will cause much heat loss, and consequently much energy loss. To avoid that loss, GoH2O recommends adding a second layer of insulation which will provide both thermal

and acoustic insulation. And thanks to the savings you make on energy costs, you can recoup this small additional investment within a few years.

CUSTOMISE YOUR SLIDE

SPECIAL EFFECTS

The appeal of water slides depends quite heavily on the special effects and other technical novelties. Accordingly, GoH2O has a large range of special effects that are guaranteed to get the adrenaline pumping. These effects range from lights and sounds to splashing water. And if that's not exciting enough for you, check out these spectacular solutions that use movement sensors.

These sensors will allow you to determine the location of the user in the slide and adapt the audiovisual effects to match. These special effects are just the tip of the iceberg as the options are countless. All our slides are customised, so we like to take a constructive approach to the best solutions for your swimming pool.

MULTIMEDIA (LED LIGHTS)

LED lights allow you to adapt the style and theme of water slide with very little effort. You can turn a colourful disco-slide into a red spinning track with just by flicking a switch. We can design effects that are customised to suit your slide and every desired effect is possible!

DAYLIGHT EFFECTS

Use daylight to create a fairy-tale effect. This effect can be achieved by incorporating symbols into the walls of the slide during the production stage. When sunlight hits the slide, it creates an enchanting effect. Of course, you can combine the daylight effects with LED lights.

SOUND EFFECTS

A perfect addition to lighting effects! Use sound effects to emphasize the effects of the lights, producing the sensation of sliding into a storm or a disco.

TRANSPARENT ELEMENTS

The higher the location, the more impressive these transparent elements will be. These acrylic elements are transparent tubes that allow you to look around for a few seconds and observe the height at which you are sliding, guaranteeing an impressive experience!

LED DISPLAYS

If you incorporate LED displays into your water slide, you can display texts, pictures and, even moving images, which will produce some very unusual special effects!

START ELEMENT

Add a moving start platform to ensure that the users have a good warm-up before diving into the slide. Wait patiently while a few seconds are counted down and the platform will start, and... GO!

WATER CURTAIN

A curtain of water will add a refreshing aspect to the slide. You can adapt the water pressure, so you can vary between a gentle breeze and a waterfall.

This feature can be installed in a slide with a full tube or half-tube, made from polyester or stainless steel.

CUSTOMISATION

Perhaps you have other wishes or perhaps you are interested in our many other options. The sky is the limit! You will be amazed by the abundance of spectacular options and our specialists would love to tell you more about them.

OUR SMALL SLIDES

Just like a full-sized swimming pool, a toddling pool is not complete without a wonderful water slide. And of course you want this slide to be a perfect match for the rest of

your swimming bath! That's why, at GoH2O, you can fully customise your small slide too!

Because we customise our products, the options are countless. How about a slide shaped like your mascot or your logo? Like our large slides, we make our small water slides from high-grade, glass-fibre reinforced polyester, which we can supply in a very large range of

RAL colours. Moreover, it is possible to produce slides that fully match [existing] play features, platforms and walls. Whatever your wishes may be, we will make sure they become a reality!

OUR QUALITY

At GoH2O, the primary focus is always on quality, by which we mean both the quality of our products and the quality of our service. We work hard to build long-lasting slides and long-lasting relationships with our customers.

THE QUALITY OF OUR PRODUCTS

Our slides are made from high-grade, glass fibre reinforced polyester, produced manually by means hand lay-up. The technique we use ensures that there are no unhygienic, maintenance-sensitive seams in the sides of the tubes, so the slides require less maintenance and will last longer.

THE QUALITY OF OUR DELIVERY

We try to take as much work as possible off your hands. If you wish, we can supply our water slide as a turnkey delivery, including all the construction work and fitting the water installation. Thanks to our comprehensive advice to our customers, you will know just what to expect. Our project manager will ensure that the work proceeds

without a hitch at the site. Perhaps you want to have a tube slide repaired, refurbished or replaced? You have come to the right address, as these jobs are not a problem for GoH2O. We'd love to explain all about our customised solutions at an advisory meeting.

THE QUALITY OF OUR SERVICE

Our experienced service staff will ensure that your slide is always at its best and that any breakdowns, which are unlikely, will be repaired as soon as possible. Our maintenance team is active throughout Europe, so we can send our staff to your aid for repairs within 24 hours. We look after your slide so you can concentrate fully on your own work.

MAINTENANCE AND SERVICE

We think it is important that we always provide an optimal service. That's why our maintenance team operates Europe-wide and its service staff can reach you within 24 hours for [emergency] repairs. Moreover, we offer maintenance contracts which include annual maintenance on your slide. That maintenance work

includes checking the water pump and cleaning the start element and the catch unit. We also check the bolted joints, cemented seams and tubes and repair any damage. If you choose to buy a slide from GoH2O, you will have guaranteed maintenance and service of the very best quality.
